

# Lab 5: Hooks & Annotations

**Goal:** add `beforeAll`, `beforeEach`, `afterEach`, and `afterAll` hooks and attach an **issue annotation** (with a URL) so it shows up in reports.

---

## 1) Edit your spec file

1. Open your [sample.spec.js](#)
2. After the import statement, add a new code block for each of these:
  - `beforeAll`
  - `beforeEach`
  - `afterAll`
  - `afterEach`
3. Add an annotation for including an “**Issue**” URL.
